## FOR IMMEDIATE RELEASE

### The Foam Depot, Inc. Announces all new Expanded Polystyrene Interior and Exterior Foam Architectural Product Line

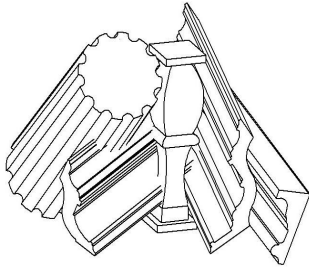

**Alpharetta, GA -- January, 2007**—The Foam Depot, Inc. today announced the release of their expanded polystyrene foam architectural product line and teaming with NMC America architectural products . These products revolutionize the architectural industry for commercial and residential builders, architects and homeowners. The product lines are for interior and exterior use and replaces wood products at a fraction of the cost of wood. The new products put money back into the bottom line of a budget in savings not only in product cost but savings of installation labor and finishing.

Below lists the new products that are currently being distributed:

- **CAPS AND BASES**
- **INTERIOR/EXTERIOR COLUMNS**
- **INTERIOR CROWN MOLDINGS**
- **BEAM SYSTEMS**
- **STUCCO UNDERLAYMENTS**
- **PEDESTALS**
- **PROPS**
- **SIGNAGE**
- **MONUMENTS**
- **WALL CAPS**
- **WINDOW ARCHES**
- **CONCRETE MOLDS**
- **QUOINS**
- **KEYSTONES**
- **CORNICES**
- **BALUSTRADES**
- **Concrete Molds**

Traditionally leading architectural products were natural woods, stones or cements, but in recent years synthetic alternatives to these products have grown in availability and in use due to ease of design, installation and cost savings. The Foam Depot is pleased to announce its hot-wire cut EPS architectural products such as moldings, columns, balustrades, beam systems for the interior or exterior and designed foam underlayings for stucco, windows and door trim. These products are exciting in that they provide the beauty, design and wow-factor of natural products along with cost effective design, installation and maintenance adding bottom line benefits to builders and consumers.

"We designed the base product line to reproduce the standard wood products currently used by builders today. This fact creates an easier transition for builders because of the same wood appearance while also providing the benefit of cost savings," said Bruce Trott, President of The Foam depot, Inc. "We are continually enhancing the product line by offering greater design offerings with a two day turn around time on custom orders."

## The Products Can Be Tuned to Specific User Specifications

The Foam Depot clients may chose products from our design catalog or create custom designs. The Foam Depot's design catalog was formed by previous custom designs, so whether it is a standard product or a custom architectural look you are after, The Foam Depot can handle your design needs.

## About The Foam Depot, Inc.

The Foam Depot, Inc. is an architectural product manufacturer for the commercial and residential building industries. The Foam Depot was founded by two engineers who saw an opportunity to provide both design and quality EPS profiles at very reasonable prices. In the beginning, block and product pickup and delivery were done using the family car and product was sold directly from the garage. Their commitment to customer satisfaction through an interactive design process, meeting clients demanding time schedules and standing behind their work helped establish the business. "The Foam Depot" now supplies to the construction, exterior stucco, commercial building, interior decorating and Surf Board manufacturing industries.
